

SAFETY DISTANCES

Safety distances to flammable structures, measured from the fire box	To sides *)	To back*)	Up to the ceiling	To front
To sides *) Up to the To front To back *)	100mm	150mm	1000mm	400mm

*) Safety distances can be reduced by 50 % using single and 75 % using double protection. (Single protection for example with a 7 mm thick fibre strengthened fire cement plate or 1 mm thick metal plate + 30 mm air passage, double protection with two of the above mentioned plates with two 30 mm air passages)
